

Teledyne e2v's Product/Process Change Notice (P.C.N.) and End Of Life (E.O.L.) Notification Policy applicable for Semiconductors products

Teledyne e2v follows guidelines for Process/Product Change and End Of Life Notifications in agreement with JEDEC JESD46 (PCN) and JESD48 (EOL) standards.

The classification of Major and Minor changes is determined as defined in the standard

- Major change: is a change that may affect the form, fit or function of the product,
- Minor change: is a change that does not affect the form, fit, function, quality or reliability of the product.

This determination is made by Teledyne e2v, based on data available at the time of the PCN release. Customer will be notified of Major changes. Customer may also be notified of Minor changes that may impact them as decided by Teledyne e2v. Teledyne e2v reserves the right to make changes without notification when form, fit or function are not affected.

Teledyne e2v procedures requirements are that:

- Change Notices should be issued at least 90 days in advance,
- Datasheet and Samples should be made available to customers at least 90 days prior to the proposed first ship date. However, shipment may occur prior to 90 days if approved by the customer.
- End Of Life Notices should be issued at least 6 months (180 days) prior to the Last Time Buy (LTB) date, and 12 months from the notice for final shipments.

To access PCN/EOL official notifications (2 options available):

- Option 1 : Teledyne e2v customers may receive notifications via email from Teledyne e2v sales department,
- Option 2 : Teledyne e2v customers may view all PCN/EOL notifications on Teledyne e2v website by selecting <https://semiconductors.teledyneimaging.com/en/products/obsolescence-management/>

If you have any questions or comments regarding Teledyne e2v's PCN/EOL service or a specific notification, please contact your local Teledyne e2v sales office.
